Midstate Telecom, Inc.

Functionality in Emergency Situations

Back-Up Power

With our current infrastructure there are three locations within our network, where backup battery is a concern; central offices, remote cabinets and ONT's locations at the customer premise. Each are addressed below:

CO

Midstate Communications has 10 central offices which serve 100% of our customer base. The switching and transport systems inside these CO's are powered by DC power with current draws ranging from approx 20 amps to 250 amps. The runtime of each battery system is slightly different based on current draw and geographical location but they range from approx. 12 hours to 40 hours. Each central office is equipped with an on-site generator and an automatic transfer switch; thus we expect the **required** run time of these battery systems to be only a few seconds but have designed them to support our network for significantly longer runtimes in case of a generator failure. We also possess a 60 KW portable generator for deployment ensuring Central Office operation throughout an on-site generator failure.

REMOTE CABINETS

Approximately 5% of our current customer base is served by these remote cabinets located in the field within 3 miles of the subscriber premises served. Each DC system inside these cabinets is designed to support 8 hours of runtime in case of a power failure. We possess 22 portable generators in all, with several of them being staged in strategic geographical locations for easy deployment in the event of a power failure.

ONT

The ONT's are located at the customer premise in our Fiber-To-The-Home network configurations. We have approximately 2700 deployed ONT's delivering service to 35-40% of our subscribers. Any ONT located within the city limits are equipped with a 7.2 amp-hour batteries and provide an expected runtime of 8 hours. Knowing the power failure outside the city limits can be longer, we deploy

a larger battery providing additional run time. These batteries are 20AH and deliver an expected runtime of greater than 16 hours.

RE-ROUTING OF TRAFFIC AROUND DAMAGED FACILITIES

ALL core network connections are ring protected and any established traffic is automatically re-routed without impact to these customers. Any call not yet established or in a "setup" state during a reroute situation (fiber cut, central office failure, etc.) would fail and these callers would need to reacquire dial tone and replace the call. The time the routes would be unavailable is less than one second, thus any subsequent call attempts would be successful.

Our connection to the outside world is via our centralized equal access provider: South Dakota Network. The Kimball office is positioned in the logical center of our network and houses a node on the above mentioned statewide DWDM MPLS network. This network utilized alternate fiber routes throughout the state of South Dakota functioning in a mesh environment to deliver our traffic to the SDN location in Sioux Falls, SD. As for our intra-company Interexchange facilities; they include 3- EPS Rings (Calix), 1 – OC-48 ring (Fujitsu), and 1 MPLS ring (Brocade) functioning in a mesh environment.

TRAFFIC SPIKES

Currently Midstate provides dial tone to approximately 4150 subscribers. The soft-switch we utilize is manufactured by Meta Switch and can support 250,000 subscribers before any expansion or upgrade is required. Our customer connections to this switch are either GR303 or MGCP and in this configuration the switch can support 1.3 M Busy Hour Call Attempts. As for the trunking, we have toll and 911 routes to South Dakota Network and CenturyLink. These routes are actively monitored for overflow and near overflow states. Any near overflow or overflow situations are addressed immediately after receiving any alarm.

Midstate Communications, Inc.**Lifeline Terms and Conditions**

Midstate Communications, Inc. offers Lifeline program-supported service to qualified low-income residential consumers for one telephone line per eligible household. Lifeline assistance lowers the cost of basic, monthly local telephone service. Eligible consumers can receive \$9.25 per month in discounts. In addition, the Federal Universal Service Charge is not assessed to consumers participating in Lifeline. Toll Blocking prevents the placement of all long distance calls for which a subscriber would be charged. Toll blocking is available to eligible consumers at no cost. Also, by choosing this option, consumers are usually not charged a deposit.

Lifeline Program Eligibility Information**Program Based Eligibility**

Consumers are eligible for Lifeline if they, one of their dependents or their household participate in one of the following qualifying assistance programs:

Midstate Communications, Inc. Voice Lifeline service includes unlimited local minutes-of-use within the toll-free calling area. Midstate's Voice Lifeline Plan does not include any free minutes-of-use for toll. Toll is billed at the standard toll rate depending on which interexchange carrier the consumer subscribes to for toll service. As part of the Lifeline service, Toll blocking is available to eligible consumers at no cost.

Rates

Subscribers may receive the Lifeline credit on any type or grade of local service, including bundled services that are normally offered by Midstate Communications, Inc. Advertised rates do not include any applicable taxes or surcharges.

Recertification of Lifeline Eligibility

Lifeline recipients are required to recertify their eligibility annually. Failure to properly recertify a recipient's continued eligibility for the Lifeline program will result in termination of the Lifeline recipient's monthly Lifeline discount and de-enrollment from the Lifeline Program.

Additional Lifeline Program Information

The Lifeline program is limited to one benefit per household, consisting of either wireline or wireless service. A household is defined, for purposes of the Lifeline program, as an individual or group of individuals who live together at the same address and share income and expenses. Lifeline is a government benefit program, and consumers who willfully make false statements in order to obtain the benefit can be punished by fine or imprisonment or can be barred from the program.
